 **Wrocław, Poland**
On-site / Hybrid / Remote

SKILLS

Typescript, JavaScript

C#, JAVA

React, Redux

HTML5, CSS3, Sass (SCSS), BEM

Node.js, Express

Next.js

Vue.js

Fetch, REST API

Figma, Material UI, ShadCN

TailwindCSS, Bootstrap

Git/GitHub, VS Code, Chrome

Developer Tools (incl. React),

NPM

SQL

Basic OOP understanding

Jest, Cypress

 Polish: native

 English: B2

EDUCATION

Computer Science –

Cybersecurity

Master's degree

WSB Merito University – Wrocław

2024 – present

Computer Science–Software

Testing

Postgraduate studies

Copernicus University – Wrocław

2015 – 2016

International Military Relations

Postgraduate studies

National Defence University–Warsaw

2015 – 2016

National Security – Military Security

Master's degree

Military Land Forces Academy

2010 – 2012

Paweł Nowicki

Fullstack Developer

Full-stack developer with experience in building scalable web applications. Proficient in both front-end and back-end technologies, including **HTML**, **CSS**, **JavaScript**, and frameworks like **React** and **Node.js**. Skilled in managing databases with **SQL** solutions like **PostgreSQL** and ensuring backend security. As a former military officer, I developed **precision**, decision-making under pressure, and leadership in **dynamic** environments—skills I now apply to software development. Passionate about creating user-friendly interfaces and efficient server-side logic, while staying up to date with the latest trends in web development. Additionally, I am involved in a **charitable project** for a hematology foundation, which perfectly reflects my commitment to initiatives that deliver real value and meaningful help to others.

PROJECTS

Hemato Run

[LINK](#)

React

A professional, commercial application designed for a charity run event, featuring intuitive login and registration forms. This responsive app leverages specified technologies to deliver a seamless and engaging user experience across all devices.

Phone Catalog

[LINK](#)

React app with Redux

This phone catalog **application** built with React enables users to browse and filter phone data through an external **REST API**. It uses **React Router** for navigation, **Redux** for state management, and **SASS** for styling, creating a modern and responsive user interface.

ToDo App with API

[LINK](#)

React task management application

A "todo" application built with React that allows users to **manage tasks** through an interactive interface and communication with an external REST API. The application utilizes **React Hooks** for state management and **SASS** for styling, ensuring aesthetics and responsiveness.

Welcome to the MET

[LINK](#)

Responsive museum website

The static **website** uses semantic **HTML5** for content structuring, **SASS** for styling, and **JavaScript** provides the ability to add interactivity.

2048 Game

[LINK](#)

JavaScript game

A 2048 **game** built using **JavaScript**, **HTML5**, and **CSS3**, featuring a **responsive** design that adapts to different screen sizes. The **application** employs a straightforward logic for combining tiles and managing the game state, while CSS transitions enhance the visual experience during gameplay.

EXPERIENCE

Full-stack developer

2024 – present

The Foundation For Leukemia Patients

Creation and refactoring of existing code, optimization of functionality. Ensuring code quality, improving performance, and maintaining scalability throughout the development process.

Full-stack developer – internship

2023 – 2024

Mate Academy Poland

Creating responsive websites using the technology stack listed in the CV under the guidance of mentors.

Head of the Brigade's planning section

2023 – 2024

10th Wrocław Communications Brigade

Creating and revising classified **documentation** at various confidentiality levels while following outlined **requirements**.

Officer – operational section of the regiment

2019 – 2023

10th Commanding Regiment of Wrocław

An officer in the operational section of a regiment develops **plans**, leads **training** and missions, coordinates **logistics**, ensures **communication** with command, conducts risk assessments, manages **safety**, and maintains **relationships** with civilian authorities.

Junior officer – training section of the regiment

2017 – 2019

10th Commanding Regiment of Wrocław

Organizing practical and methodological exercises at the regimental level. Implementation of diagrams by the methodology of training and methodological activities.

Motorized Infantry Company Commander

2012 – 2017

17th Mechanized Brigade in Miedzyrzecz

Commanding a mechanized infantry company. Organizing training along with logistical support for initiatives. Participation in practical exercises and computer-assisted exercises.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

Paweł Nowicki

Fullstack Developer

Hello, I am a **Fullstack Developer**, a **student of Computer Science** specializing in **Cybersecurity**, and a former professional soldier. Thanks to an early retirement, I can fully dedicate myself to creating web applications.

What drives me to work is the opportunity for continuous development and the quick and visible **results** that come from building websites. For this reason, I decided to leave military service to pursue a career as a full-stack developer and expand my knowledge and skills in this field.

I have served for many years in the Army as a company commander of a mechanized infantry unit and later as a staff officer. During my service, I learned to **collaborate** effectively and **communicate** clearly and precisely. I was responsible for making key decisions under time pressure and in difficult conditions, a skill that I successfully applied in the IT world as well.

The **key skills** I developed during my service include:

- Effective work under stress, with little sleep, and in conditions of mental exhaustion.
- Quick and effective decision-making.
- Ability to collaborate and trust superiors, combined with openness to communicate problems.
- Confidence and consistency in action – if I commit to completing a task, I will see it through to the end, regardless of the difficulties.

One of my greatest **professional achievements** is my contribution to transform the military unit from a regiment to a brigade. For several years, I worked on data analysis and preparing the necessary documentation, which made this change possible.

I am convinced that the experience I gained in the military, combined with my passion for programming, will allow me to successfully realize my potential as a full-stack developer.

Thank you for your time and the opportunity to share my story. I hope to have the chance to tell you more and showcase my skills soon.
